

# LET'S FOLD SOME FUN!

Make sure you click "single-sided" and "fit to page" if not already selected in your print preview window.

Cut out and enjoy! If you don't have a printer, cut out a square shape from a piece of paper.

We would love to see your origami pieces once finished. Take a pic and tag us! @atjtravel.

follow the instructions below to make your

# ORIGAMI CRANE

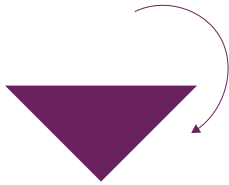

**Fun fact:** The paper crane is symbolic for peace and hope. It is also said by the Japanese that if one is to fold 1,000 cranes, they will be granted a wish by the Gods.

▼ 1

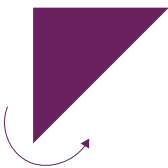

Start with the square piece of paper you just cut out.

2

Fold the paper in half by folding the top corner to the bottom corner.

3

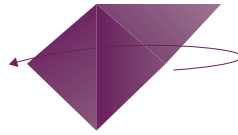

Fold it in half again, by taking the left corner and folding to the right.

4

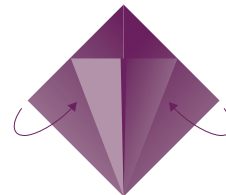

Take the top flap and open it. Then take the right corner and bring it to the bottom corner.

5

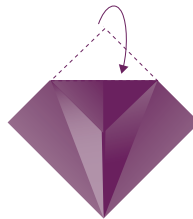

Flip the paper over and repeat step 4.

6

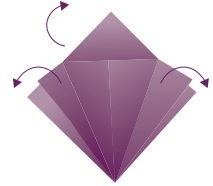

Fold the top layer's left and right corners to meet in the middle.

7

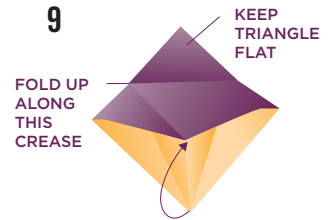

Fold the top triangle down.

8

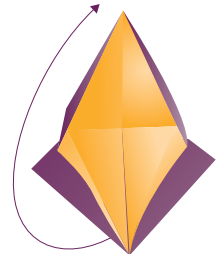

Now unfold the top triangle and unfold the left and right folds.

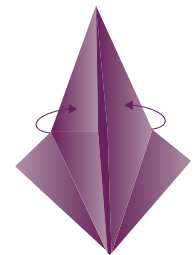

9

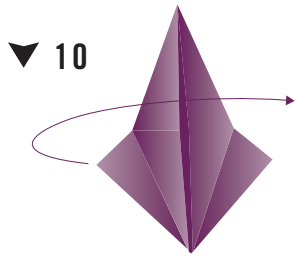

Take the bottom of the top layer and open it up.

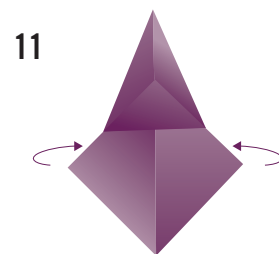

This is what it should look like as you move the bottom corner of the top flap up.

As you reach the top, fold the left and right sides in to the center to form a diamond shape.

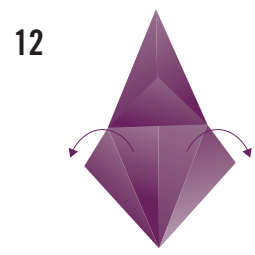

Turn it over.

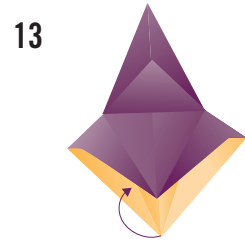

Fold the left and right corners into the center.

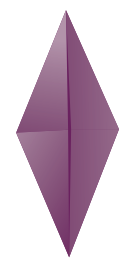

This is the shape you should end up with.

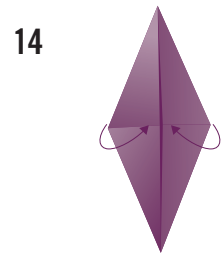

Unfold.

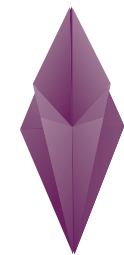

Like step 9, take the bottom of the top layer and open it up.

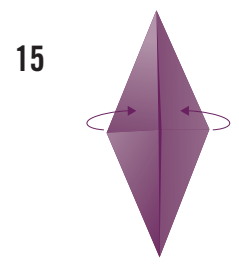

This is the shape you should end up with.

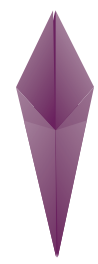

Fold top layers inward, meeting in the center.

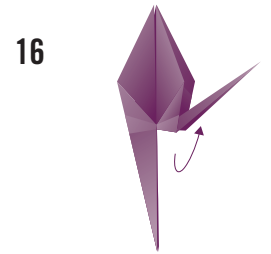

This is the shape you should end up with.

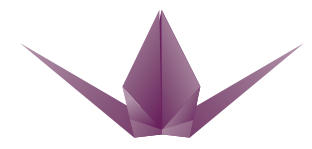

Turn over and repeat step 14.

This is the shape you should end up with.

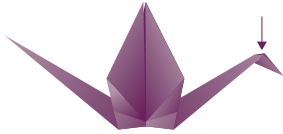

Inside reverse fold the bottom or "legs" to make the neck and tail.

The form should look as shown.

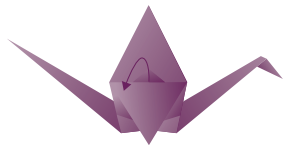

▼ 17

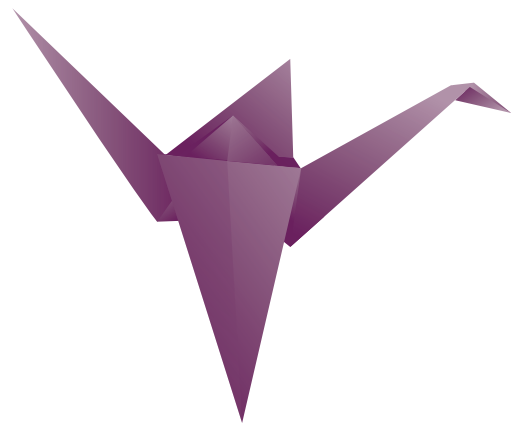

Inside reverse fold one side to make a head.

---

18

Fold down both wings.

**FINISHED!**
