# LET'S FOLD FOLD FOLD!

Make sure you click "single-sided" and "fit to page" if not already selected in your print preview window. Cut out and enjoy! If you don't have a printer, cut out a square shape from a piece of paper.

We would love to see your origami pieces once finished. Take a pic and tag us! @atjtravel.
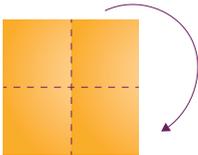

ATJ

ORIGAMI ELEPHANT

Tip: We recommend you use paper that has different colored sizes, as it is easier to keep track of your folds.

1

Start with the cut square piece of paper, yellow side up. If you didn't print and are starting with a blank sheet, mark each side to differentiate.
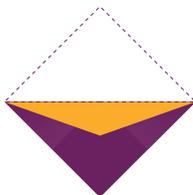

2

Fold the paper in half vertically and horizontally to mark the vertical and horizontal center lines, and unfold.

3

Unfold and rotate, corner up, and flip to the other side.

4

Fold the paper in half by folding the top half to the bottom half. Crease firmly.

5

Fold right flap down. Crease firmly.

6

Take that same flap and fold the bottom corner up. Crease firmly.

7

Open flap back out. Take the highlighted crease.

Fold the crease to the highlighted crease on the left.

Your paper should look like the image above. Crease firmly.

Take the right side of the flap and open it.

Flatten open fold. Crease firmly.

Fold the flap up to its top corner. Crease firmly.

8

Unfold, with middle crease sitting up.
See image above.
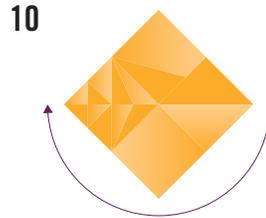

9

HOLD THIS OVERLAPPED CORNER.

Fold the bottom corner up and over by holding down the corner overlap highlighted in the image, and bringing the corner to meet the dotted crease.
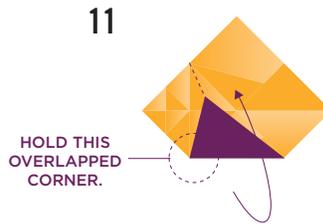

CREASE.

Crease firmly up to the next crease, highlighted here.

Open creased flap. The new crease should look like the highlighted above.

10
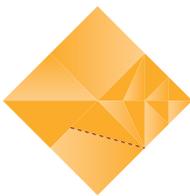

Rotate 180 degrees, so the new crease is at the top.

11

**HOLD THIS OVERLAPPED CORNER.**

Repeat step 9.
Fold the bottom corner up and over by holding down the corner overlap highlighted in the image, and bringing the corner to meet the dotted crease.
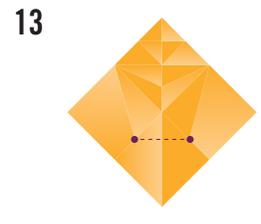

**CREASE.**

Crease firmly up to the highlighted fold line.

Open creased flap. The new crease should look like the highlighted above.

12

Rotate 45 degrees, so the side with the most creases is facing up.

13

Make a new crease from these points, highlighted in the image above. The new crease will connect both highlighted corners.
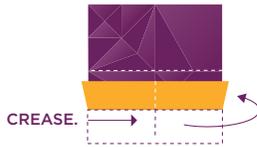

To do that, fold up the bottom corner to the highlighted point **or** as close as possible to the point where that crease will connect from one corner to the next corner.
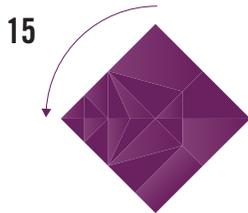

CREASE.

Only crease firmly between the highlighted creases as shown above.

14
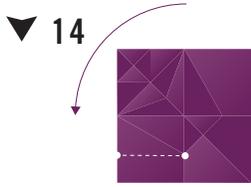

Unfold, flip and rotate 45 degrees to the left. There needs to be a crease here as shown above.
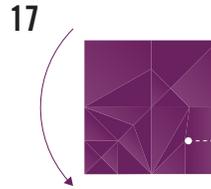

CREASE.

To do that, fold as close as possible to the highlighted crease in the image above. The goal is to get the highlighted crease from the beginning of step 16. Crease firmly.
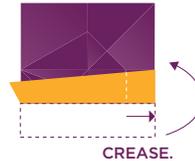

15

Unfold and rotate 45 degrees to the left.

16

CREASE.

Fold the bottom corner up to the highlighted center as shown above. Crease firmly to the highlighted crease as shown above.
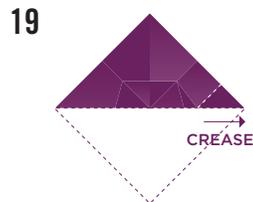

17

Unfold and rotate 45 degrees to the left. There needs to be a crease between these two points above.

CREASE.

Fold the bottom up to the middle and crease from the highlighted line to the edge.
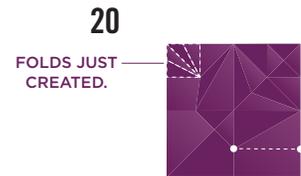

18

Unfold.

19

CREASE.

Fold in half, pulling bottom corner to the top corner. Firmly crease from the highlighted crease to the edge.

Turn over and fold in the right corner, but not all the way.

Take that same flap and fold it up to align with the highlighted edge. Unfold.

20

FOLDS JUST CREATED.

There needs to be a crease here.

CREASE.

To do this, fold as close as possible to the highlighted crease in the image above. The goal is to get the highlighted crease from the beginning of step 20.
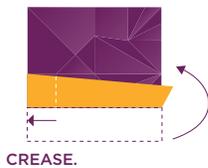

▼ 21

Unfold and rotate 45 degrees to the right.

22

CREASE.

Fold corner up to the highlighted center. Crease firmly to the highlighted crease as shown above.
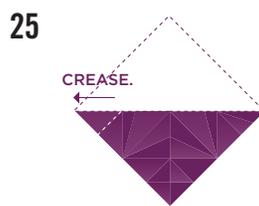

23

There needs to be a crease between these two points as shown above. To do this, rotate 45 degrees to the right.

CREASE.

Fold the bottom up to the middle and crease from the highlighted line to the edge.

24

Unfold and rotate 45 degrees.

25

CREASE.
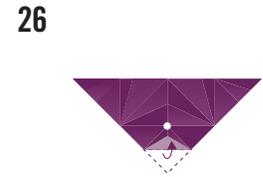

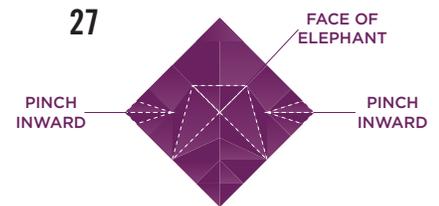

Fold in half. Crease the corner as shown above.

Turn over and fold in the right corner, but not all the way.

Take that same flap and fold it up to align with the edge. Unfold corner.

26

Taking both bottom corner flaps, fold along the crease to the highlighted area. This creates a creased flap on the other side that will be used later.

27

FACE OF ELEPHANT

PINCH INWARD

PINCH INWARD

Unfold, take the two highlighted areas that will be the tusks, and pinch and push both inward toward the middle.
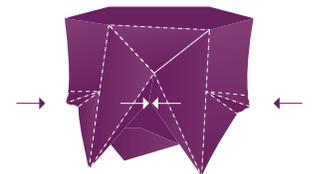

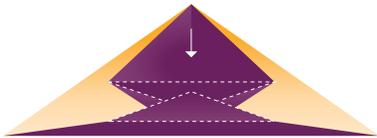

Keep pushing the tusks inward. Reaffirm creases if the paper is not easily folding in.
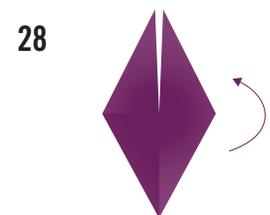

28

The elephant starts taking shape. Now flip over to the bottom and notice a diamond like fold as shown above. Close this opening.
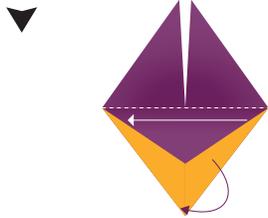

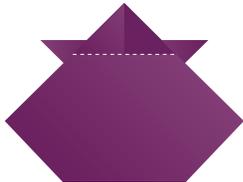

Take the top half of the flap and fold down and crease.

VIEW FROM BOTTOM

Keeping everything together, insert the flap opposite into the opening/pocket just created.

After inserting flap, crease a bit to keep the flap inside the pocket. Reaffirm all ceases for a crisp look.

FINISHED!
